deaths and other catastrophic injuries. The poor care and fraud has led to many overdose or related fatalities. Patient brokering and urine "farms" have driven up costs with limited state funded options for those needing treatment for predatory behavior by the private treatment providers coupled with limited resources available. There is poor regulation of the treatment industry, opening a gap in care for young people under 30, surpassing gun shots and car accidents combined. Substance Use Disorder has been identified as the number one cause of death for young people. Our country is now in the midst of one of the greatest public health crises in modern American history. We are not quite sure how to approach this issue. At Romano Law Group, Ramsey and Horton are currently working on some of these pharmaceutical cases in the MDL litigation in West Virginia.
